SUMMARY

I am a Senior Full Stack MERN Developer with 4 years of experience building scalable and robust web app for Silicon Valley AI startups to highly complex ERP system for European clients.

EDUCATION

University Of Gujrat   **Oct 2016 – Oct 2020**
Bachelors in Software Engineering

EXPERIENCE

— Senior Full Stack MERN Developer   **Nov 2020 – Present**
Iyrix Technologies
- Worked with the European client on an ERP system building RESTful APIs and a highly interactive front-end dashboard.
- Worked with the Silicon Valley AI startup team as Frontend Developer building intuitive and visually appealing user interfaces (UI) using modern front-end frameworks like React.js.
- Designed and implemented scalable and efficient application architectures, leveraging best practices and design patterns to ensure maintainability and performance.

Full Stack MERN Developer Internship   **Jul 2020 – Oct 2020**
Iyrix Technologies
- Developed practical skills in building web applications using the MERN (MongoDB, Express.js, React.js, Node.js) stack, gaining proficiency in front-end and back-end development.
- Faced real-world challenges and learned to troubleshoot and debug issues efficiently, enhancing problem-solving abilities.
- Gained understanding and practical experience in deploying web applications to cloud platforms such as AWS or Google Firebase, ensuring scalability and reliability.

PROJECTS

VYRILL | *ReactJs, TypeScript, Redux, Bootstrap*   **Jan 2023 – Nov 2023**
- Vyrill is a SaaS AI Video content analytics startup that provides insights from user-generated videos for businesses and brands.
- Collaborated closely with cross-functional teams to implement new features and integrate front-end components with back-end services, ensuring seamless data exchange and synchronization.
- Enforced coding standards and best practices to maintain code quality and readability, while actively staying updated with the latest front-end technologies to enhance product capabilities.

STANDARD WORKS | *ReactJs, NodeJs, Express.js, MongoDB, TypeScript*   **Nov 2020 – Dec 2022, Nov 2023 – Present**
- Standard works is a SaaS ERP system, which helps businesses manage their operations, time, resources, finances, IOT devices, maintenance, labor, and much more.
- Designed and implemented key features and modules, focusing on scalability, performance optimization, and security to meet the diverse needs of clients and ensure regulatory compliance.
- Provided technical leadership and mentorship to junior developers, collaborated closely with clients to gather requirements, and continuously improved the ERP system based on user feedback.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, TypeScript
Frameworks: React, Node.js, Next.js, Redux, Express.js, Material-UI, Bootstrap
Databases: MongoDB, SQL,
Developer Tools: Git, Docker, AWS, Google Cloud Platform, VS Code, Postman
